Mastering Country-to-Country Tickets in Ticket to Ride®: Switzerland

The latest expansion brings a new layer of strategy to your favourite train-adventure game!

Ticket to Ride®: Switzerland Expansion introduces an exciting new mechanic – country-to-country tickets.

These tickets can mean big scores or deductions for players, so they need to be utilised effectively. Here are some tips and tricks to navigate the country-to-country tickets.

Identify hub cities

Take a look at the map and figure out which cities connect to multiple important destinations. For example, Zurich features on nine normal tickets and one of the four city-to-country tickets.

Lock or block

Slow opponents down by blocking routes or locking them down for yourself! Shorter connections can make or break another player's plans.

Secure country nodes quickly

The bordering countries on the map have limited nodes, so if you're aiming to complete a country-to-country ticket, make sure to grab the node you need early on. These routes also end at the country in question, making them a dead end; you'll have to plan for that too!

Be realistic with tickets

Country-to-country tickets can be a huge boost to your endgame total, but if you fail to complete them, they can also cost you the game. Consider where you are in the game before taking on a country-to-country ticket!

How will you conquer the tricky country-to-country tickets? Share your winning strategies with us!

Ticket to Ride®: Switzerland Expansion arrives 10th December 2024.
